TapWatch Application

Auto Registration

Setup a Site: Auto Registration

The TapWatch application gives you the option of using auto registration to add transmitter IDs (TXIDs)

When you select Add Unit, a new window appears

Setup a Site: Auto Registration

Enter the unit name, select Start Auto Registration, the "+" symbol the utility type and other information as required.
Press reset on the transmitter and the TXID will auto-populate in the TXID field.

Add Unit

Enter the unit to be created. Click the Next button to save each unit. To register devices using the reset button click the Start Auto Registration button.
